	Q.	•	·		a	/KB 315/62 9 November Copy <u>3</u> of	1962
	memorandum for	: Chief, I	Defensive Syst	tems Division	, 081		
	ATTENTION:						
	FROM:	Chief, C	CIA/PID (NPIC)	)			
	SUBJECT:		i Photographic sive Storage s				n.
	REFERENCE:		nirement OSI/F				
	1. This	memorandum	is in respons	se to your re	quirement d	ated 25 Se	ptember 196
	Storage and Ha	etalled pro ndling Area	s based on	terpretation	or the sary	onagan ex	plosive
	and including			_		-	
	2. The a	ttached dre	wing of the i	facility incl			
	ne all abaness		and and then the	Sp. 4114+m	DANS MIRAM	+>AMA AATIM	
	of all observed	able featur					
	discernible but in most instant	able featur t due to th ces. The t	ne verticality curning radii	of the phot of reads wit	ography the	se were no	t observabl ed from 25
•	in most instant to 150 feet.	able featur t due to th ces. The t Building be	ne verticality turning radii eights are + 5	of the phot of reads wit feet due to	ography the hin the fac the poor q	se were no ility rang- uality of	t observabled from 25 the shadow
·)	discernible but in most instant to 150 feet. It images. The he	able feature t due to the ces. The t Building he eights of t	ne verticality curning radii eights are ± 5 the revetments	y of the phot of reeds wit feet due to have been e	ography the hin the fac- the poor q stimuted fo	se were no ility rang uality of r the same	t observabled from 25 the shadow reason.
	discernible but in most instant to 150 feet. It images. The he	able feature to due to the ces. The the Building he eights of the boto analyse	turning radii eights are + 5 the revetments	of the phot of reads with feet due to have been en	ography the hin the factor the poor questions to form	se were no ility rang- uality of r the same and he may	t observabled from 25 the shadow reason.
). 	discernible but in most instant to 150 feet. It images. The he can extension	able feature t due to the ces. The t Building he eights of t hoto analys	turning radii eights are ± 5 the revetments at on this pro- you have any	of the phot of reads wit feet due to have been e	ography the hin the factor the poor quantities for the time ted for the ti	se were no ility rang- uality of r the same and he may	t observabled from 25 the shadow reason.
) <sub>1</sub>	discernible but in most instant to 150 feet. It images. The he can extension	able feature t due to the ces.
